

Seal Coating

What to expect prior to completion of project.

1. Customer will be contacted by the scheduler or salesperson 24-48 hrs prior to completion of project.
2. Completion of project is weather dependent and if rain or cold temperatures are in the forecast Huyser Asphalt will contact customer to reschedule to later date. If the pavement is wet or there is a chance of rain we may reschedule. Please keep in mind that in most cases rescheduled work does not happen the next day that weather allows, instead it will be pushed back to next available day that other jobs are not already scheduled.
3. Once scheduled, customer should contact anyone who may need access to driveway (friends, family, etc) and let them know that the driveway will be unavailable for use.
4. Irrigation/sprinklers should be turned off 24 hrs before and after date of work. Rescheduling or 2nd trips back due to water on driveway from sprinklers will result in a \$50 charge.
5. Customer should have any vehicles they need out of garage/driveway area prior to start of work.
6. If weeds or moss is present in cracks, the customer is responsible to spray weed kill on weeds/moss prior to start work.
7. Customer is responsible to mark any privately owned lines. These include, but are not limited to: electrical lines, dog wires, etc. Huyser Asphalt is not responsible for damage to any unmarked lines.

What to expect after completion of project.

1. Huyser Asphalt will rope/flag off driveway upon completion work.
2. Customer can remove rope/flags and start using driveway after 24 hours of drying time. Customer may throw away rope/stakes.
3. Huyser Asphalt will not repair or discount driveways if someone drives across fresh sealcoat.
4. Customer should keep children & pets off driveway for 24 hrs.
5. Settling of rubber in very large cracks is to be expected.
6. During hot weather customer may see tire marks in new sealcoat. These marks will wear in after a few months.
